

LTANS-NOTAREQS-02

*“Requirements for Data
Validation and Certification
Services”*

Larry Masinter

Adobe Systems
8/1/2005

Document review

1: Introduction

- Proper linkage to archive requirements?

2: General requirements

- Surely there are more

3: Use cases

- Are these sufficient?
- Are all of these useful?

4: Specific workflows

- Not complete enough; should cover use cases

5: Technical requirements

- Not complete; needs more details

6: Operational considerations

- Inserted to separate out from protocol requirements

Summary comments

- **Changes from previous version**
 - Terminology: avoid “notary”
 - Remove remnants of previous drafts
- **Please review**
 - Terminology OK?
 - Need more use cases?
 - Are the use cases valid?
- **My impression**
 - Current document is “thin”
 - needs more content, motivation
